Re: GN Docket No. 09-191

Dear Chairman Genachowski and Commissioners:

As the owner of a small, family-run business that has been in operation for more than 10 years, I would like to express my concerns regarding the net neutrality policies you are considering.

Access to the internet by broadband has revolutionized the way our company does business in just a few years. We can now serve more customers, more efficiently, than ever before. Our business is no longer a local concern. We now have customers all over the country.

This did not happen by accident. We began changing how we do business as the technology evolved. The technology evolved because private sector companies invested in innovation and creativity in an open, competitive marketplace. As you know, this innovation that is so vital to not only my business, but in my view... the entire economy of the United States did not come about because of government rules and regulations.

So I urge you to strongly consider this as you develop these new policies. Thank you in advance for your consideration.

Sincerely,

Links Technology Solutions, Inc.
Brian Burke
President and CEO
